

★★★★★★

GREEN HABITS

for your kids

Wondering how you can teach your children to be environmentally sensitive around the house? They'll earn gold (ahem, green) stars with these habits!

★
Turn water off when brushing your teeth.

★
Snack time? Be sure to close the fridge.

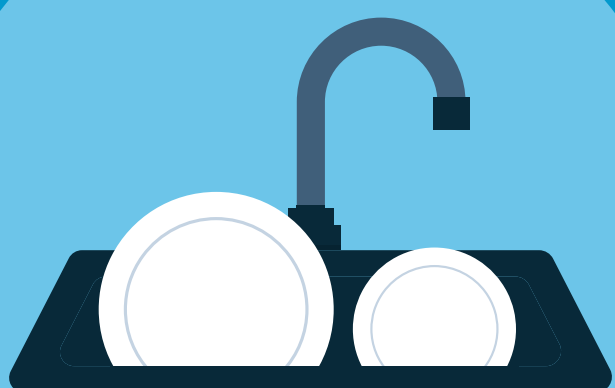

★
Trade 30 minutes of TV time for a book or family game.

★
Use a solar charged nightlight so you don't have to plug in.

★
Help mom and dad hand wash and dry the dishes.

★
Try a microwave mug cake recipe for your next dessert instead of baking a cake in the oven.

★
Make an art project using recycled materials, or old drawings to make a collage.
